  FDO is a database of grantmakers, grants and grant recipients. It is made available in a tiered structure with different levels of access to suit the need of subscribers. While the full database is only available on-site at the Newburgh Library, Candid has graciously allowed us to make the Essential version freely available online during the COVID-19 crisis, giving patrons access to funder profiles of over 103,000 grantmakers, and access to their 990 form data.
